decusoft™

software that works the way you work

Comp and Sense

COMPOSE by Decusoft automates and streamlines complex merit, bonus and long-term incentive compensation processes. Our configurable and scalable, Web-based software allows you to strategically use compensation to recruit, retain and incent employees while meeting corporate goals and objectives.

Exceptional people and superior support back Decusoft's software solutions. Our team of human resources, compensation and technical experts has an extensive, proven track record of delivering highly configurable, practical solutions that

address your most complex compensation issues. And, our client-focused approach allows us to partner with you to implement a compensation software solution that truly works the way you work.

We realize that compensation planning is a challenging, time-intensive task encompassing many types of data, complex rules and compliance requirements. This is why Decusoft prides itself on providing a configurable product that makes it simple to enforce corporate policies and overcome complex compensation challenges.

should old comp processes be forgot and never brought to mind

compose™

original solutions every time

Yes, forget them.

This year, resolve to streamline and automate complex variable pay administration with **COMPOSE** by Decusoft.™ Create comp processes you want to remember.
